FREMANTLE STAINLESS

— Manual Instruments —

The historic city of Fremantle was established in 1883 and has operated as a Port serving Western Australian businesses for over 150 years. Today, Fremantle is home to an eclectic mix of over 2000 businesses focussed on a broad range of bespoke offerings. Fremantle Stainless continues to follow this enterprising and enduring spirit.

Fremantle Stainless specialises in the provision of Sterile, Single Use Surgical Instruments specific to the needs of the Australian Healthcare Community. When the multinationals have decided the production volume required is too low for them to bother - this is where we excel.

Fremantle Stainless can provide top quality single use instruments at competitive prices for usage volumes in the millions per annum...and in the hundreds per annum.

Taking Your Pain Away

Sourcing, Reprocessing, Repairing, Replacing, Stocktaking & Logistical Management of Surgical Instruments is time consuming, risk heavy and very expensive. Being able to pick an instrument off the shelf and know it's clean and ready to be used makes life a lot easier. Costs are reduced as are any risk from reprocessing errors or faults.

Let Fremantle Stainless conduct an Instrument Audit for you. We can identify those instruments that can be converted to Single Use, providing you with cost savings, risk reduction and improved efficiency.

When you are looking for any type of Manual Instrument, include us in your search. Many of our existing customers found us when we solved their instrument procurement conundrums for them.
